LETTER FROM THE CONCLAVE PRESIDENT

It's over. We planned a long time, had many set-backs, begged and borrowed materials, and now the weight is lifted. It's over.

I think I can say for all the students and faculty at the University of Georgia School of Forest Resources that we enjoyed putting together the 19th Annual Conclave. (An independent survey of sunburned but smiling faces confirmed our idea that you enjoyed it, too.) The camp was ideal, the weather was beautiful, and the competition was fierce.

I would like to congratulate Arkansas on yet another First Place Team Trophy.

I would like to thank all the judges and timers, Mr. Reid Parker as over-all advisor, my fellow officers, and all the committee members and volunteers, without whose help we could not have had a Conclave.

As an added attraction, this year we are listing the record times for each timed event for as far back in time as we have Southern Foresters.

I hope that by changing the routine of the Conclace we have opened the door to more and better changes by the future host schools. We appreicated that the member clubs were receptive to our ideas, and not bound by tradition.

A word of caution. If the Conclave as we know it is not to be placed on the "endangered species" list, we will have to clean up our acts. With a little self-control on the part of *each school,* this problem will correct itself.

We at the University of Georgia wish Stephen F. Austin a lot of luck for the 20th Conclave. Through our experience this year we found that you can plan all you want, but luck is the deciding factor.

Don Stone
Conclave Committee Chairman

From left to right: Sharon Nix, Secretary; Michael Daugherty, Editor of *The Southern Forester*; John Rheney, Treasurer; Sam Dolliver, Vice-President; Lance Hunt, Chairman of Judging and Scoring Committee; Don Stone, A.S.F.C. President.

FROM OUR DEAN

In this bicentennial year the 19th Annual Conclave of Southern Forestry Schools was hosted by the University of Georgia, which started the whole thing back in 1959. That Conclave was held at the Rock Eagle 4-H Center near Eatonton; representatives from nine schools participated. Again in 1967 the event was held in Georgia with contestants from nine schools, this time at Jackson Lake near Covington, the site of the '76 Conclave.

Although I, personally, was unable to witness only a part of one day's competition this year, even that little exposure brought home to me very forcefully the evolution from a modest beginning of contests among representatives from among relatively few schools - there weren't so many schools in existence in 1959 - to a fierce spirit of rivaly among well-coached and highly-trained student teams from Kentucky to Florida and Texas to Virginia. This had to be the best Conclave ever, judging from the records established, the consumption of beer, the excellent food, the number of contestants and spectators on the distaff side, including Carolyn ("I am Delicious"), the deportment of all in attendance, the outstanding facilities, and a cooperative weatherman.

I am extremely proud of the Georgia students for planning and executing such a tremendously successful undertaking. Acknowledgement is also due many of our faculty and staff without whose back up support the students could not have accomplished what they did. The resident managers of the Jackson Lake FFA/FHA Camp, Mr. and Mrs. Marvin Herrington, I salute for their cooperation, tolerance, and understanding.

Hope I'm still around for the next Conclave in Georgia.

Allyn M. Herrick, Dean
School of Forest Resources

Acknowledgements

The Forestry Club of the University of Georgia express their appreciation and gratitude to the following companies and individuals who helped to make the 19th Annual Conclave the success that it was.

SYLVANS
FORESTRY CLUB

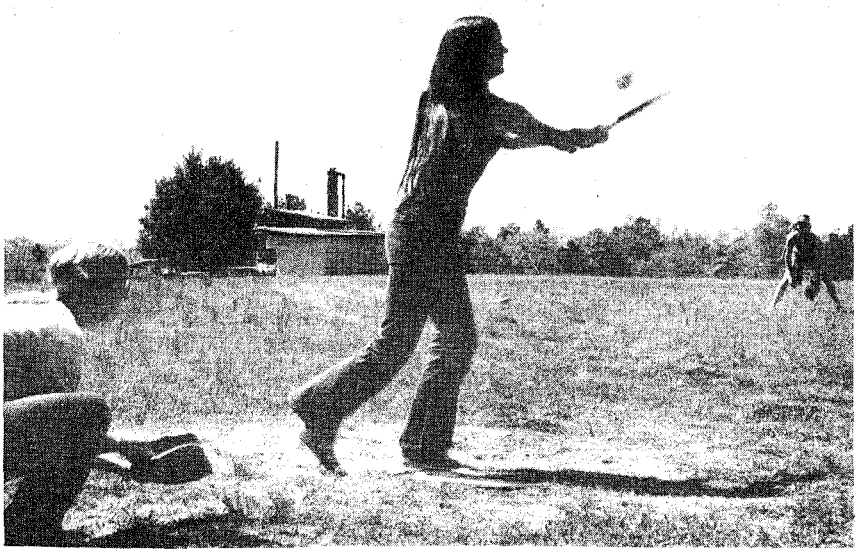

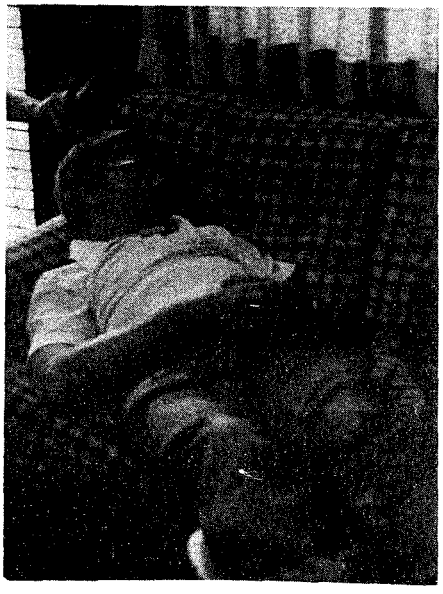

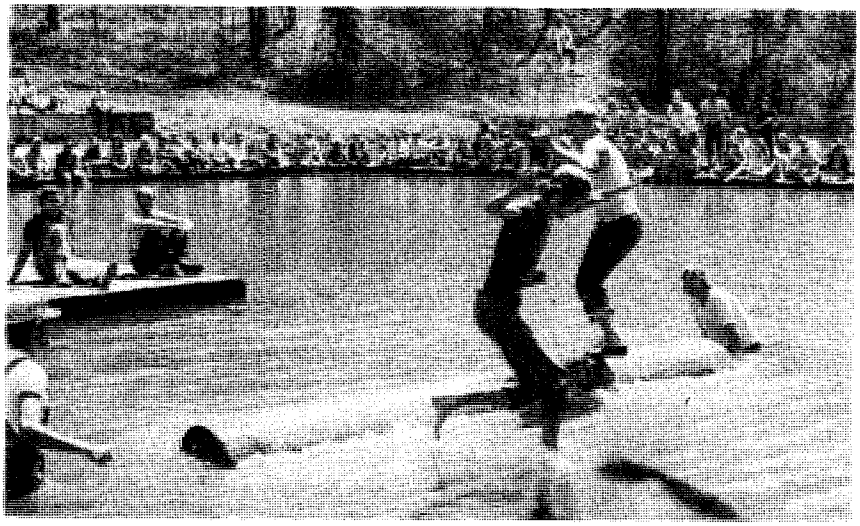

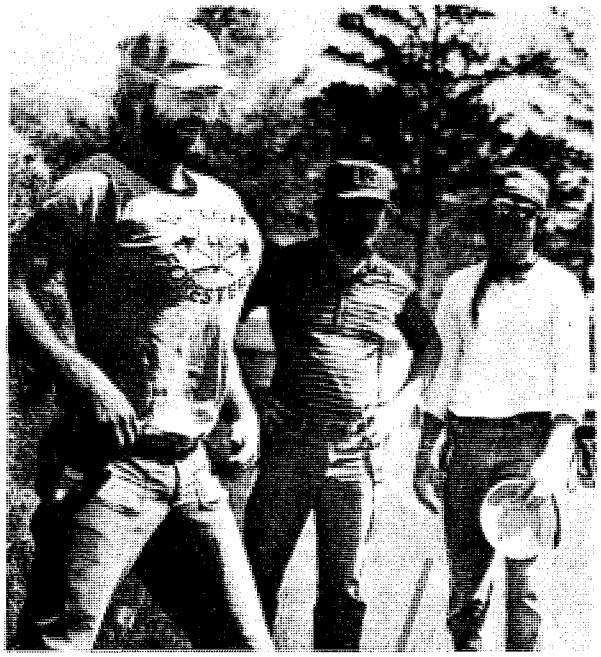

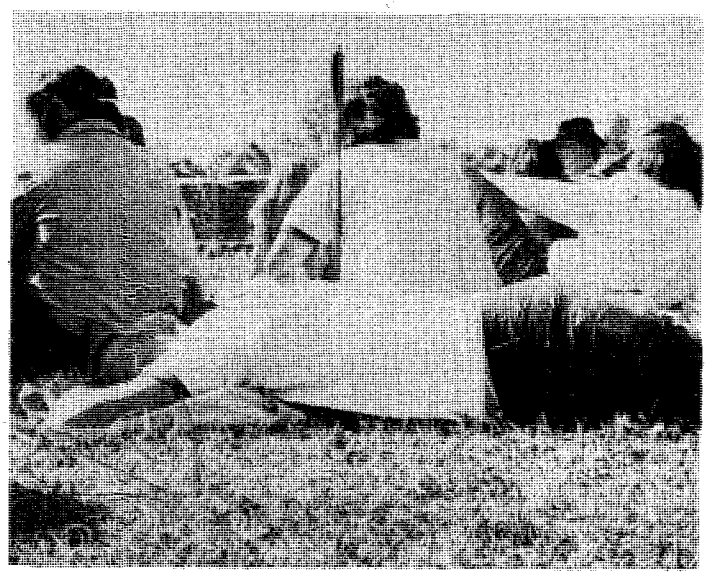

UNIVERSITY OF GEORGIA

The School of Forest Resources at the University of Georgia has an active and dedicated Forestry Club. The Club was formed in 1914 and produced its first annual in 1916. During the school year of 1925-1926, two significant events occurred. First, the Forestry "Cabin" was built. Second, the first female, Jane Oakly, was admitted to the school. Miss Oakly's stay was short, however. She became afflicted with a dreadful disease.

The activities of the Club are many and varied. The Club, always interested in good diplomatic relations, organizes a student-faculty gripe session which has evolved into the Student-Faculty Interaction Committee. This group lets the students feel that they have a voice in matters of school policy. Each year the Club coordinates the annual Conclave qualifying Field Day, the Fall Brawl, Snow Ball, and the Lumberjack Ball. These and other activities are held at Flinchum's Folly, a newly constructed Recreation Center located in the University's famous Whitehall Forest.

This year has seen more unashamed roof-raisin' and foot-stompin' than ever before. Mitch Flinchum, namesake of Flinchum's Folly, has even come up occasionally to help with these chores.

The Club elects a President, Vice-President, Conclave Chairman, Treasurer, and Secretary. These officers head various large committees which carry out the Club's activities. The Club sends two representatives to the Ag Hill Council. Attempts are always made to secure a deserved portion of University -at- Large Students Activities funds, but the Club, ultimately, wholly supports itself.

Because of the informal nature of the Club and the good lines of communication within the School, the Forestry Club of the University of Georgia has something to offer every student in the School of Forest Resources.

STEPHEN F. AUSTIN STATE UNIVERSITY

The Sylvan Forestry Club of Stephen F. Austin State University is the oldest student organization on campus and the most active group of students within the School of Forestry. This year our membership has grown to over 100 students. The club publishes a biweekly newsletter for the School of Forestry, The Knothole.

The club sponsors two intramural teams, including a girls' team, which participate in intramural athletics at the Univeristy. In the Fall, we sponsor "Lumberjack Day" which is the Friday before homecoming. All students organizations are inveted to enter events similar to those at Conclave.

Weekend work projects, primarily three removal, provide a source of funds for financing our trips to Conclave each year, to aid us in presenting Conclave nest year, and other club projects. Every spring we hold our big field day, Parents Day. This year Parents Day was March 6, with over 1,000 invitations sent to parents, alumni, teachers, and people associated to the School of Forestry. Faculty visits, slide presentations, sample classroom lectures, and eliminations for Conclave events highlighted the day. Texas style bargeque put a final touch to a good day.

TEXAS A&M

The Forestry Club at Texas A&M is a young, but growing organization on our campus. We are proud to become a member of the ASFC and look forward to future competition.

Many projects are on hand for our club members every year. In addition to our money making projects, the club is involved in a tree plaque program to identify trees on campus. At the present time we are also identifying trees on local junior high school campuses.

The club also partakes in the publication of a Departmental newsletter as well as our own annual, *The Aggie Annual Increment*. The fall and spring are sprinkled with club outings and wine tasting parties. In the spring we have our annual skid-a-dieu, which is our own miniature conclave.

We are happy with our admittance in the Association, and look forward to competition at Stephen F. Austin in 1977, some 800 miles closer than Camp Jackson.

UNIVERSITY OF TENNESSEE

In the past year, the Forestry Club at the University of Tennessee has built up a membership of over 90 people, an increase of about 60. Along with membership, enthusiasm has increased in all aspects of the club, especially Conclave. Spurred by our poor showing in the past, everyone is working to assure a better showing at this year's Conclave.

Activities this year included a Spring picnic, overnight hike in the Smokey's and a huge "Welcome Freshmen" bonfire at the beginning of Fall quarter. Several hikes, a field day with Conclave events, and several distinguished speakers were a few other Fall quarter activities. This last Winter quarter was filled with more speakers and our annual Winter Banquet.

Several projects were initiated over the year such as our seedling sale, firewood sale, acorn sale, and our Christmas tree planting (to provide money in the future for when we host the Conclave). A special account was also opened to help fund the 1980 Conclave.

Minutes of the Business Meeting

The business meeting was called to order by A.S.F.C. President, Don Stone, at 7:00 p.m., April 10, 1976.

Wildlife. A motion was made by N.C. State that Wildlife be added as a point event and that the rules would be as stated in the University of Georgia Wildlife Conclave Rules.
Stephen F. Austin will take measures to clarify these rules for the 1977 Conclave.
The motion was carried.

Photogrammetry. A motion was made by Stephen F. Austin that Photogrammetry be added as a point event.
Stephen F. Austin will set up the rules for it.
The motion was carried.

Greased Pole Climb. A motion was made by Stephen F. Austin that there be a non-point greased pole climbing event at the 1977 Conclave.
The motion was carried.

Women's Crosscut Sawing. A motion was made by Kentucky that a new event, women's crosscut sawing, be put on probation. The rules will be the same as men's crosscut sawing except for Rule 4.
The cutting material will be an 8" x 8" cant rather than a 10" x 10" cant.
The motion was carried.

Dendrology. A motion was made that Rule 5 be changed to the following:
5. There will be one point for the correct family name, one point for the correct genus name, and one point for the correct species name. Each must be spelled and capitalized correctly in order to be counted correct by the judge.
The motion was carried.
A motion was made by Clemson that equipment that can be used in the Dendrology event includes optical aids.
The motion was carried.

Log Chopping. A motion was made by Stephen F. Austin that Rule 3 be changed to the following:
Each contestant must furnish his own axe. The axe used may either be single or double bitted with up to a 7-½ point head and any length handle.
The motion was carried.

Pole Climbing. A motion was made by V.P.I. that Rule 6 be amended with the statement:
Prior to the pole climbing event, the judge shall test the shoes or feet of each contestant to make sure they are not sticky.
The motion was carried.

The meeting adjourned at 9:00 p.m.

Respectfully submitted,
Sharon Nix
1976 Conclave Secretary

A.S.F.C. Constitution

Article I. Name

The name of the organization shall be the Association of Southern Forestry Clubs.

Article II. Objectives

A. To benefit the forestry clubs of the various southern schools by an interchange of ideas and stimulation of good fellowship among the club members.
B. To establish and maintain:
   1. Unity of purpose and action within and among the southern forestry clubs.
   2. A high standard of professional ethics.
   3. Closer cooperation and relationship between students and professional foresters.
C. To hold an annual conclave.

Article III. Membership

A. Qualifications
   1. Any forestry club of a university or college of Alabama, Arkansas, Florida, Georgia, Kentucky, Louisianna, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, or West Virginia granting a baccalaureate degree in forestry, or equivalent, with a major of forestry, or a higher degree in forestry, shall be eligible for voting membership in this association upon a majority approval of a petition submitted to the voting member clubs; or by application by representation at the Annual Conclave.
   2. Charter Members: Louisiana State University, University of Florida, Stephen F. Austin College, Mississippi State University, Oklahoma State University, University of the South, University of Arkansas at Monticello, Auburn University, University of Georgia, North Carolina State College, and Clemson Argicultural College.
   3. Any Forestry Club of a senior university or college within the states listed in Part 1 of this section not granting a baccalaureate degree in forestry shall be eligible for associate membership upon a majority approval of a petition submitted to the voting member clubs.
B. Privileges
   Members (each club) are entitled to one vote and full participation in all conclave activities.
C. Dues
   1. The Annual dues shall be one hundred dollars ($100) for each member club. Entering clubs shall pay a reduced rate to be set by the Association.
   2. The dues shall be used to pay for correspondence, publications, and other association expenses of the host club and any excess funds may be the host club's.
   3. The dues for the year will be paid to the host school by January 1, preceding the Conclave.

Article IV. Officers

A. The officers of the association shall be:
   1. President - elected from and by the host club.
   2. Vice-President - one elected from and by each member club.
   3. Secretary - elected from and by the host club.
   4. Treasurer - elected from and by the host club.
   5. Editor - elected from and by the host club.
B. The duties of the officers:
   1. The duties of the President shall be:
      a. To preside at all meetings of the association.
      b. To appoint committees.
      c. To be responsible for submitting an officer's report to the accumulative files upon the completion of ASFC Conclave.
      d. To be responsible for obtaining reports from each of his committees and officer heads of the host club.
      e. To perform all other duties necessary.

2. The duties of the Vice-President shall be:
   a. To act as a representative of his club.
   b. To notify the president of his election.
   c. To complete a report of the activities of the association, and be responsible for submitting materials to the host club for annual publication.
   d. To be responsible for submitting to member club publications within his club and maintaining an accumulative file of ASFC correspondence.
3. The duties of the Secretary shall be:
   a. To keep the minutes of all meetings of the association and to conduct all correspondence relative to the business of the association.
   b. To submit an officer's report for the accumulative files upon the completion of the ASFC Conclave.
4. The duties of the Treasurer shall be:
   a. To receive and have custody of all money paid to the association.
   b. To keep a careful record of all receipts and expenditures.
   c. To prepare a financial report for publication in the annual issue of *The Southern Forester*.
   d. To be responsible for the collection of the dues.
5. The duties of the Editor shall be:
   a. To gather and edit all material for the annual publication, *The Southern Forester*.
   b. To see that the provisions of Article VII are carried out.

C. Tenure of Office.
Officers are to hold office until the next Annual Conclave with the exception of the editor, who will serve until the publication is distributed.

D. Election of Officers;
1. The President, Secretary, Treasurer, and Editor of the Association shall be elected by the host club at their first club meeting following the Conclave.
2. Vice-President of the Association shall be elected by their respective clubs at their first meeting following the Conclave.

Article V. Meetings

A. Time of Meetings
1. The business meeting will be held on the Friday preceding the ASFC field day.
2. The exact time of the meetings is at the discretion of the host club.

B. Election of the Host Club.
1. The host club shall be selected from bids submitted by member clubs at each annual meeting by a roll call majority vote two years in advance.
2. In case of tie, the President shall cast the deciding vote.
3. No club shall be the host more than once in three years.
4. If a previously elected host notified the members of the ASFC, by October 1 of the year before it is to hold the Conclave, That it cannot hold the Conclave, the President shall solicit bids from the members and then send a ballot to each member club to be voted on in writing.
5. The host club shall be alternated from east to west whenever possible.

C. Files.
1. Accumulative files shall be maintained by the host club and shall include all members' reports and correspondence.
2. Each file shall contain a copy of the ASFC Constitution.

Article VI. Amendments

The constitution may be amended or revised by a two-thirds vote of the voting members clubs.

Article VII. Publications

A. Title. The title of the publication shall be *The Southern Forester*.
B. The constitution shall be published annual in the publication of *The Southern Forester*.
C. The past host club shall publish the ASFC periodical within one month after the Annual Conclave.
D. Securing items for publication.
   1. The articles shall be edited by the member club and submitted to the host club.
   2. Article to be printed in the current issue must be in the hands of the publishing editor not later than the time of the Annual Conclave.
E. Distribution. Each Conclave contestant will receive one (1) copy of *The Southern Forester*. A minimum of twenty (20) copies will be sent to participating member clubs.
F. Proceedings of the Conclave. Proceedings of each Annual Conclave, including minutes of the business meetings, will be published by the past host club in the annual publication.

Article VII. Contests

A. Competitive events will be held at each Annual Conclave.
B. There will be 20 standard competitive contests at each Annual Conclave.
   1. Standard events:
      a. Dendrology
      b. Compass and pacing
      c. Timber estimation
      d. D.B.H. estimation
      e. Pole classification
      f. Wood technology
      g. Chain throwing
      h. Axe throwing
      i. Knife throwing
      j. Pole climbing
      k. Bow sawing
      l. Log rolling
      m. Cross-cut sawing
      n. Log chipping
      o. Bait casting
      p. Pole felling
      q. Log birling
      r. Archery
      s. Photogrammetry
      t. Wildlife
   2. Scoring will be based on the number of schools participating in the Conclave. First place winners in field events will be awarded a number of points equal to the total number of schools participating. Second place winners receive 1 less point than the total number of participating schools, third place winners will receive 2 less points than the total number of participating schools, and so on with each succeeding participant who satisfactorily completes the event receiving one or more points. First place winners in technical events will be awarded a number of points equal to the number of participating schools multiplied by 1.5. Second place winners will receive 1.5 points less than the total number of points awarded first place winners; third place winners will receive 3 points less than the total number of points awarded first place winners and so on with each succeeding participant who satisfactorily completes the event receiving 1.5 or more points.
C. In addition to the 20 standard events established in Section B, there may be a maximum of five (5) contests at the discretion of the host club provided that these contests be specified with rules and explanations at the preceding Annual Conclave. Requests for omission of any standard contests will be made at the preceding Annual Conclave with a two-thirds (2/3) majority vote necessary for approval.
D. The standard set of rules will be made and approved by the voting members of the ASFC.
E. Selection of judges of all contests will be left ot the discretion of the host club except in the event the host club participates; then judging will not be done by members of the host club.
F. Only students presently enrolled in school or department of forestry will be eligible to enter ASFC events. In the case of the University of Florida and the University of the South, freshmen and sophomore students presently enrolled and who have declared an intention of enrolling in the forestry department or school at the beginning of their junior year will also be eligible for participation.
G. The contestant must meet the same requirements as are specified for individual participation in school athletics. The contestant must be an undergraduate student and he must meet his own school's requirements both scholastically and in credit for athletic participation.

H. In the event that the Conclave delegation or spectators from any member school intentionally or otherwise interfere with the progress of any event in the Conclave, that delegation shall forfeit the rights to score any points in that event.

I. V. P. I. is hereby considered a member of the ASFC by vote taken on May 4, 1963.

J. A table of random members will be used to choose order of team's participating in each event. This order will be sent to each participating school before the Conclave.

K. Contest protests must be filed with a committee of staff members within fifteen (15) minutes of the individual infraction. The protest committee shall be composed of three (3) staff members of schools within the Association. They shall be appointed by the host school and cannot serve as judge in any event.

L. Contestants in the log chopping event must wear hard-toed footwear. The use of shin guards is left to the individual's discretion.

M. Tennessee is hereby considered a member of the ASFC by unanimous vote taken on April 9, 1967.

N. The University of the South is hereby no longer considered a member of the ASFC after the submission of a letter of resignation on April 12, 1969.

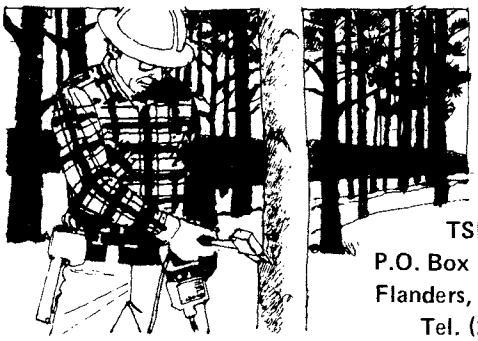

O. The University of Kentucky is hereby considered a member of the ASFC by a vote taken on March 29, 1974.

P. Texas A&M University is hereby considered a member of the ASFC by a vote taken on April 12, 1975.

TREE FARMER PRODUCTIVITY

The C6D skidder matched with an AG5000 grapple sets the pace for year-round woodlands productivity. Here's a combination that has the power, maneuverability, visibility, high undercarriage clearance, front axle oscillation, and the speed that it takes to get those extra payloads per day to the landing. Add rugged durability and engineered accessibility for faster and easier repair and maintenance for minimum downtime...and you have a year-round profit maker. See your Tree Farmer Dealer for further information on why the C6D grapple skidder is setting the pace for productivity.

The Value of a Tree

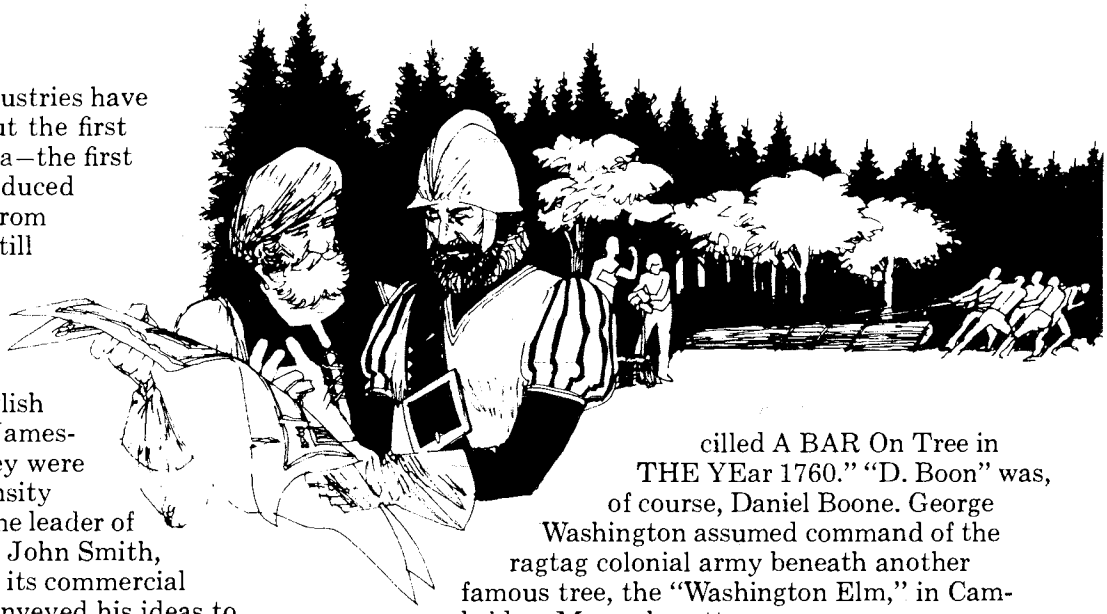

St. Regis knows the value that a tree has. Trees are very important to St. Regis, so important that we raise over thirty million seedlings a year. We manage our forest lands as carefully and as professionally as we can to provide the fiber and paper needs of today and of twenty-five years from now. For St. Regis the year 2000 is just around the corner.

ST REGIS

SOUTHERN TIMBERLANDS DIVISION

Jacksonville, Fla. Monticello, Miss. Pensacola, Fla.

America's first industry: now more important than ever.

Over the years, industries have come and gone. But the first industry in America—the first enterprise that produced finished products from raw materials—is still vital and dynamic. In fact, it's more important today than ever before.

When early English settlers landed at Jamestown, Virginia, they were awed by the immensity of the forest. But the leader of the group, Captain John Smith, quickly recognized its commercial possibilities. He conveyed his ideas to London, and several months later Dutch and Polish millwrights arrived in the New World. Under the direction of Captain Smith, they constructed a sawmill near Jamestown, and America's first industry was born. The year was 1607.

The Value of Lumber

Soon, America's vast virgin forest was supplying products for many industries. The forest also provided building materials for homes, shops, and churches.

Because of the heavy demands on the forests and inaccessibility of the enormous wood supply in the interior, the early colonists actually worried about a wood shortage. As early as 1798, newspapers and magazines were urging conservation measures to preserve and improve the forest. It's interesting that the methods advocated at that time are common in modern silviculture (forest management). Editorials urged the thinning of diseased and stunted trees. The harvesting of old trees to promote growth of younger, faster-growing trees. And the thoughtful regulation of fires which settlers often used to clear land for crops.

But conservation was difficult because wood was vital for the colonists. They used it to build buggies, buildings, ships, butter churns, walkways, furniture—almost everything.

The colonists and early Americans found other interesting uses for trees. A famous colonial charter was hidden in the base of a tree to keep it from the British. On a tree in northeastern Tennessee, these words were carved: "D. Boon cilled A BAR On Tree in THE YEar 1760." "D. Boon" was, of course, Daniel Boone. George Washington assumed command of the ragtag colonial army beneath another famous tree, the "Washington Elm," in Cambridge, Massachusetts.

The Future of the Forest

These are just a few examples of the role played by the forest in early America. It was important then. It's important now. And it will be even more important in years to come. Because wood is a renewable resource. And, while other natural resources are dwindling, the forest can go on forever.

Georgia-Pacific is helping protect this natural resource by managing its forests scientifically. In addition, the Company is planting millions of trees each year. And, each year, more of the newly planted trees are "supertrees" which are bred from superior stock. The "supertrees" grow faster, are healthier, and have more usable wood fiber than ordinary trees.

However, a wood shortage in the U.S. is possible in the near future because vast tracts of forestland, most of it government-owned, are *not* being managed to best advantage. That is why it is so important that G-P, as a private timberland owner, *is* heeding the words of the conservationists of 1798. Because, as much as Americans relied on the forest products industry in the past, they'll rely on it even more in the years to come.

Georgia-Pacific
The Growth Company

High Yield Forestry includes research!

Controlled pollination to help us develop superior trees is one part of our forestry research.

And research is just one part of our High Yield Forestry. Also involved are planting millions of seedlings, fertilizing, thinning, harvesting, and complete utilization of the fiber from the forest.

Besides products, our forests provide recreational opportunity, serve as a habitat for wildlife, protect watersheds, and return oxygen to the atmosphere.

Weyerhaeuser

The Tree Growing Company

Trees for the future

The seedlings we plant today, will serve the needs of our children tomorrow.

Trees provide the raw materials for a great many of our products. And through modern technology and good forest management, UNION CAMP is doing its part to insure that there'll be trees to fill the needs of our children . . . through the 21st century and beyond.

We must plan ahead because the demand for trees is expected to remain strong right into the future. According to United States Forest Service estimates, the great and growing need for lumber, pulp, paper and paper products will continue.

By using our trees wisely and by renewing what we have used, UNION CAMP is striving to guarantee that there will always be trees for the future.

Union Camp **Growing in more ways than one.**

Union Camp Corporation, Savannah, Georgia 31402

Why International Paper is helping to develop a 1,000,000-acre forest on land it doesn't own

We want to make sure there'll still be enough wood products around when your children grow up.

Industry sources estimate Americans will use about twice as much paper and wood in the year 2000 as they use today. And the U.S. Forest Service predicts that our nation's commercial timberlands won't be able to keep up with the demand.

One of our solutions is to help private landowners increase their yield. They own about 60 percent of America's forest lands—yet produce only 30 percent of the wood fiber. (Forest products companies own only 13 percent of the forest lands—and produce 34 percent of America's fiber.)

We're looking especially to people who own land close to our operations in the South—America's woodbasket. In 1976 we'll expand our program to the Northeast and West Coast.

How we help landowners

We do it through the Landowner Assistance Program.

We'll show a private landowner how to prepare a site, plant, protect, thin, and harvest—at no charge. This way, he can get the most from his forest land—in some cases, *double* his yield.

We'll even find a contractor to do the actual work. Or do the job ourselves at cost.

For this help, IP gets the right to purchase the timber at competitive prices.

We've got more than 300,000 acres in the Landowner Assistance Program now. We're aiming for 1,000,000 before 1980.

A big help. But it's only one thing we're doing to increase the world's wood-fiber supply.

Higher yield from our own lands

We've developed a Supertree—a southern pine that grows taller, straighter, healthier and faster than ordinary pines.

We're experimenting with a new machine that can harvest an entire tree—taproots and all. The roots used to be left in the ground.

We're moving ahead on fertilization techniques. Tree Farm programs. Research.

Will all this be enough to keep the world's fiber supply going strong?

It'll help. But more must be done.

At International Paper, we believe forest products companies, private landowners and government should work together to develop more constructive policies for managing America's forests. The wrong policies can make tree farming impossible and force the sale of forest land for other purposes. The right policies can assure continuation of America's forests—a renewable natural resource.

INTERNATIONAL PAPER COMPANY
