From the President

Although the physical experience of Conclave '78 is past history, those of us who were involved with planning and hosting this 21st Annual affair, and with tying all the loose ends afterward, are proud and appreciative of the success and cooperation we feel characterize this Conclave.

Success - well, everyone seemed to be pleased with the overall outcome, and we certainly enjoyed ourselves to the fullest. Cooperation was evident both in running the camp and in conducting the events. We were able to successfully call upon other clubs several times for manual assistance, and were able to maintain and clean up the camp with a minimum of work. While competition was keen in the events, there was very little ill temper over rule interpretations or infractions.

Unlike Arkansas, who seems to have things moving along quite smoothly, we didn't begin planning for the Conclave until late fall of last year. This late start resulted in a few problems - such as the surprise wildlife list - and was the cause of much sorry and rushing in the months preceeding the Conclave. However, aside from the dock at the birling site, everything seemed to stand the test, and we were able to get by. Our planning was far from perfect - 10" cants were soon placed on the endangered commodities list by the speed chopper's siege - but we hope that our mistakes can help future hosts know what <u>not</u> to do.

I'd like to take a portion of this space to get all of you to consider the problems faced by the host club, in hopes that you will respond quickly when asked for advice or information in the future. You can imagine how difficult it is to get a definite price on "between 400 and 600 meals" for a proposed banquet, or to get an adequate camping and meal service for the same vague number of people. Also, it is very hard to rewrite rules "with input from the other clubs" when only three clubs had input. Fast, accurate communication is essential to good planning and makes the job easier for the host club.

Personally, I thoroughly enjoyed working on this year's Conclave. Although I didn't do very well in the events I entered, I hope to have more time for practice next year (I want to be a part of the 'winning team' in '79!). I am especially grateful for the experience I gained in organization and working with people. More than anything else, I was impressed by the good will, cooperation, and good natured fun that seems to be typical of any group of foresters.

Bob Shaw
President, A.S.F.C.

From the Advisor

We were pleased each of you attended the 21st A.S.F.C. Conclave. As the last group left Camp Hope on Sunday, April 2nd, it was hard to believe the 1978 Conclave was over. A Conclave is one of those events which requires an extensive planning effort, and then, concludes within the context of a weekend.

In reflecting on the Conclave two aspects stood out, these were cooperation and sportsmanship. The host club carries a tremendous responsibility in hosting a conclave, but it cannot succeed without the support of its department, college, and university. Each of these must become a cooperative partner, if a successful conclave is to be held. We in the Clemson Forestry Club had the highest degree of support and cooperation from each of these, and to each we owe our deepest gratitude.

A number of visitors to the Conclave commented on the high degree of sportsmanship exhibited by participants. Sportsmanship and a spirit of concern typified the competition of the 21st Conclave. The strength of forestry lies within the moral character of the men and women who compose our profession, and the actions of participants amply illustrated this character.

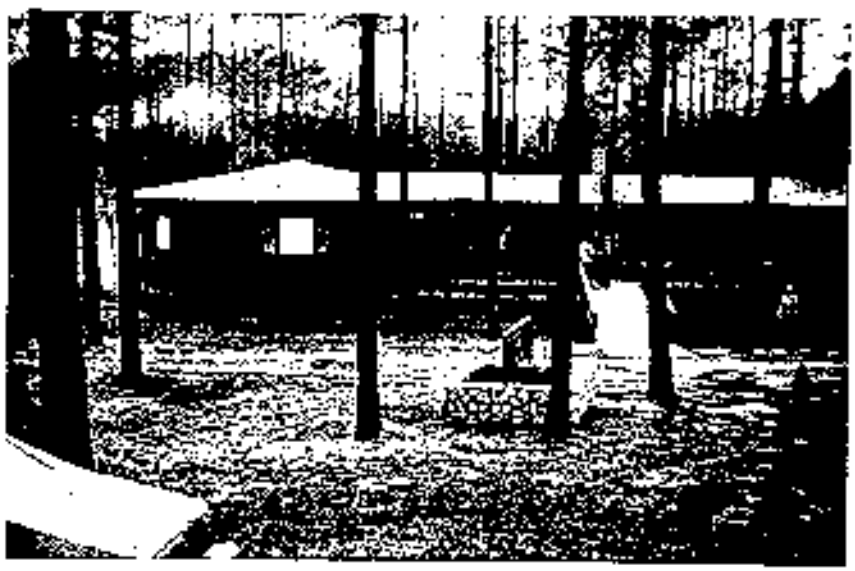

Conclaves are important to the profession of forestry. They are a format for acquainting foresters from different regions, and provide for the exchange of ideas, the opportunity of working as a team, and for the expression of skills. These are the foundations upon which the conclave concept is based, and are those for which they should be judged. The 21st Conclave was structured to meet these objectives, and judgments on its success should be based upon them.

It has been my pleasure serving as your 21st A.S.F.C. Conclave Advisor. I've enjoyed working with each of you, and greatly appreciate the assistance and support you gave us. I hope you will again visit us at Clemson.

B. Allen Dunn
Conclave Advisor

ADVERTISERS

We're Union Camp: look at us this way...

Look at us as a company concerned about the land and the heritage of generations to come.

Trees provide the raw material for many of our products. And through modern technology and good forest management Union Camp is doing its part to insure that there will be trees to fill the needs of this generation and those beyond. The seedlings we plant today will serve the needs of our children tomorrow.

We must plan ahead because the demand for the products made from trees is expected to remain strong well into the future. According to U.S. Forest Service estimates, the great and growing need for lumber, pulp, paper and paper products will continue.

By using our trees wisely and by replacing what we have used, Union Camp is helping to do its part to insure that there will be trees for the future.
